Route Accounting for Growing Distributors

Modeled after our flagship solution eoStar, eoStarOne® is a cloud-hosted route accounting software solution created specifically for growing beverage distributors.

Adaptable Industry Solution

eoStarOne® was designed to accommodate the needs of beverage distribution operations, both in terms of functionality and affordability. eoStarOne provides the tools to help you grow your business, without immediately outgrowing the software. Its upward compatibility allows you to easily migrate to eoStar when you begin to see the need to add more comprehensive functionality for warehouse, sales, and business intelligence.

Mobile Sales Applications

eoStarOne includes eoTouch®, eoStar's mobile app suite, which provides you with pre-sell, delivery, and inventory management capabilities. Leverage live synchronization, GPS tracking, and push notifications for accurate, up-to-the-minute business insight.

Flexibility and Automation

eoStarOne facilitates communication seamlessly up and down your company's organizational structure to optimize retail execution. eoStarOne streamlines reporting, supply chain and order fulfillment processes.
